

DEQ-EPA Meeting on March 13

Topic: Stormwater Source Control in Portland Harbor

Objective: Review comments from EPA of DEQ's Comprehensive Stormwater Source Control Strategy, as well as pipeshed approach and methodology for addressing pipeshed SC for Stormwater in PH.

Desired Outcome: Shared understanding and support for DEQ's program for achieving stormwater source control on a schedule that supports EPA's schedule for cleanup of the river.

Agenda

1. Review DEQ's comprehensive stormwater strategy and describe how it will evolve as we move through different stages of the CERCLA process, e.g.:
 - a. Pre-Risk Assessment
 - b. Pre-Record of Decision
 - c. RD/RA
 - d. Long Term Oversight and Monitoring
 - e.
2. Describe the approaches achieving SC in a basin, Outfall Basin 18
 - a. Describe DEQ's current rationale for determining stormwater source control has been achieved at individual sites
3. Discussion of how EPA will address SW in the ROD- what are the priorities now?
4. Review stormwater modeling which incorporates LWG data and our thoughts on how it informs our efforts
5. Group discussion of strategy, progress, and follow-up needs
